## Erratum... Erratum... Erratum... Erratum... Erratum... Erratum... Erratum... Err

---

There is an error on a drawing: the drawing on the "Skittle initial positioning" chapter (3.6.2) shows a stand at the intersection of 4 chessboard squares. The right position for each stand is in the centre of a square. So, the good position for the stands is shown on the "Playing area overview" chapter (3.1.1).

### Chapter 3.6.1

Read, "The upper edge of the skittle is circled with a silver reflective tape. This tape is 25mm wide." instead of " The upper edge of the skittle is circled with a yellow reflective tape. This tape is 20mm wide."

### Chapter 5.4

Read "The beacon underneath surfaces shall be covered with Velcro (hard "snaggable" face) as a way to fasten them on their assigned support." instead of " The beacon underneath surfaces shall be covered with Velcro (soft "snaggable" face) as a way to fasten them on their assigned support."

Errata painting references: the bridges are painted in Beige glossy finish (RAL 1001).
